ABOUT ME

As a backend developer, I have hands-on experience building scalable and efficient applications using Node.js, Express, and MongoDB. In my projects, I have designed and implemented RESTful APIs, integrated databases, and ensured seamless communication between the server and the client-side.
I am currently expanding my skill set by learning React to become proficient in full-stack development (MERN stack). This allows me to work on both the backend and frontend, creating end-to-end

EXPERIENCE

- Building Node.js applications with a focus on performance and scalability.
- Developing Express.js server-side logic, handling routing, middleware, and error management.
- Designing and optimizing MongoDB database schemas, ensuring efficient data storage and retrieval.

EDUCATION

BS-CS, *University of Education Lahore Multan Campus*

SKILLS

- Problem Solving
- Team Collaboration
- Communication Skills

Projects

I have Built Login and Signup Form where only authenticate users can login only.

I have also built CRUD App where users can create, read Update and Delete. I have use ejs template to make the frontend

I have successfully Deployed Real-time ChatApp using React and Socket.io

I have built React Movie app using TMDB MOVIE API
